# MY NAME IS VICTOR. HERE'S HOW I TURNED ₦0 TO ₦3.3M IN 27 DAYS...

I didn't grow up with a silver spoon. Not even a plastic one.

Life was tough. My parents struggled. My dad couldn't afford my university fees, so I had to move in with my uncle. That was one of the hardest periods of my life. The period i remember till this day 🙄

I was treated like a slave — insulted, overworked, isolated and slapped for no good reasons. All in the name of school, i was determined to make my mother proud so i had to endure it.

It became too much to tolerate. So i said: "ENOUGH IS ENOUGH".

That's when I stumbled on a video from a rich digital marketer at the time.

He introduced me to something called eBook marketing — the simplest way to make money online.

Here's what he said:

> "All you need is your phone, internet, and hunger for success."

And he was right.

## **WHAT IS EBOOK MARKETING?**

Simple: writing and selling PDFs a baby can do it

- Use ChatGPT or Snapchat AI to write a short book (in under 30 mins)
- Design the cover with CapCut
- Sell it on Whatsapp
- Enjoy your money made

That's exactly what I did.

Was it easy at first? No.

I didn't know what I was doing. Nobody to guide me. I made tons of mistakes. I cried some nights. But I refused to give up.

Then I read a book by Drew Eric Whitman — it changed everything.

It taught me the psychology of selling.

From that point, my results exploded.

At 19, in my 200 level while schooling at the University of Calabar, I was earning over ₦500K/month (sometimes more).

I moved out of my uncle's house.

Finished school.

Helped my younger sisters through university.

All from this same simple business.

Sometimes I think about it and still get emotional.

Because, if I could do this with nothing, just my phone. Then what's your excuse?
